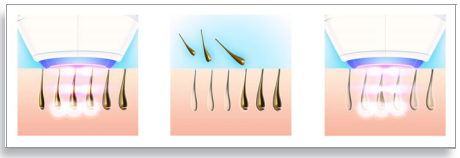
PHILIPS
sense and simplicity

Highlights

Long lasting smoothness



Philips Lumea applies gentle pulses of light to the hair root. This results in the hair shedding naturally and hair regrowth is inhibited. Repeating this treatment regularly will keep your skin smooth everyday.

Effortlessly effective

Our clinical studies have shown significant hair reduction in as little as two bi-weekly treatments, with optimal hair-free results achieved after four to five bi-weekly treatments. To maintain these results, simply repeat treatment every few weeks. Clinical studies show results are best maintained when the treatment is repeated every two to four weeks; however the time between intervals can be extended depending on your hair's regrowth.

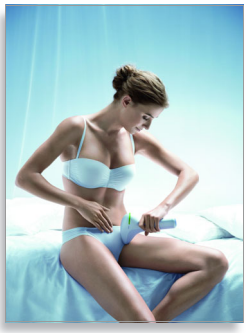
IPL technology

Philips Lumea uses an innovative light-based technology called IPL (Intense Pulsed Light), derived from the technology used in professional beauty salons. Philips has adapted this technology for safe and effective use in the comfort of your own home. Philips worked closely with leading dermatologists to develop our breakthrough hair removal system. For more than 10 years we carried out extensive consumer research with more than 1500 volunteers.

Gentle application

Philips Lumea has five adjustable light energy settings to ensure gentle but effective treatment. Used correctly, Philips Lumea's IPL treatment is safe and gentle to use even on sensitive skin and sensitive body areas.

Cordless convenience

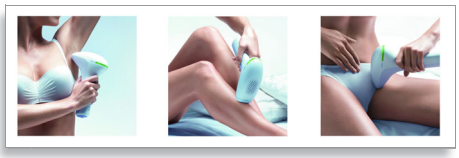


Lumea's unique cordless design is perfect for treating the areas you want, when you want.

No replacement parts needed

Philips Lumea is a complete solution that comes ready to work straight out of the box. More importantly, it does not require any replacement lamps or gels.

Application areas



Use with confidence to remove hair on body areas below the neckline: legs, underarms, bikini area, arms and stomach.

Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark blonde, brown and black hairs. As with other light-based treatments, Philips Lumea is NOT effective on red, light-blonde or white/ grey hair. Philips Lumea is also NOT suitable for very dark skin.
